2014 Japanese Championship SUPER FORMULA

Round 5 : AUTOPOLIS

Japan Race Promotion Inc. (President: Hiroshi Shirai, Head office: Chiyoda-ku, Tokyo, Japan) today announced details of the “2014 Japanese Championship SUPER FORMULA Series, Round 5 AUTOPOLIS” scheduled to take place on September 13–14 at the AUTOPOLIS International Racing Course (length= 4.674km) in Oita Prefecture, Japan.

Qualifying, which will be held on September 13, will take place over three knock-out sessions to determine places on the starting grid for the Championship race. In the event of 19 entries, the five slowest cars during the 20-minute long Q1 session will be knocked out of the next session and assigned the 15th to 19th positions on the grid. After a 10-minute interval, the 7-minute long Q2 session will determine the 9th to 14th positions in the same way. After another 10-minute interval, the final 7-minute long Q3 session will decide the top 8 positions on the starting grid. As the name of the qualifying round suggests, drivers are knocked out if they do not post strong qualifying times.

The Championship race, to be held on September 14, will be run over 46 laps of the 4.674km AUTOPOLIS International Racing Course for a total distance of 215.004km. Fuel management is likely to hold the key to victory in this sprint race, during which tire changes are not compulsory and refueling is prohibited.

With only four races and three rounds left in the 2014 SUPER FORMULA Series, competition in Round 5 is set to hot up as the drivers compete for the Championship. At the moment, Joao Paulo Lima de Oliveira (Lenovo TEAM IMPUL), who won the first race of Round 1 and Round 4, is slightly ahead at the top of the standings with 23 points. However, Kazuki Nakajima (PETRONAS TEAM TOM'S), winner of Round 3, is only 1 point behind in second, followed closely in third by the winner of the opening round, Loic Duval (KYGNUS SUNOCO Team LeMans), just 2.5 points off the lead. Hiroaki Ishiura (P.MU/CERUMO • INGING) is fourth in the standings, 4 points adrift, followed by André Lotterer (PETRONAS TEAM TOM'S), 6.5 points behind, Ryo Hidakawa (KYGNUS SUNOCO Team LeMans), 9.5 points behind, and James Rossiter (KONDO RACING), 11.5 points from the top of the very tight standings.

GET TO KNOW THE BASICS

- **WHAT IS SUPER FORMULA?** Japanese Championship SUPER FORMULA is the top category of Japanese formula racing featuring purpose-built racing cars with single-seat, open cockpit and open wheel. Organized by Japan Race Promotion Inc. and fully sanctioned by the Japan Automobile Federation (JAF), SUPER FORMULA traces back its origins to the Japanese Championship Formula NIPPON first launched in 1996. 2013 saw the relaunch of the series given a new name of SUPER FORMULA.
- **CHAMPIONSHIP AWARDS** The Drivers' Championship title is awarded to the driver who scores the most points over the course of the season. The Driver Champion is given the Series Driver's Champion Cup and prize money by Japan Race Promotion Inc. On top of this, he receives the Confederation's Cup offered by Parliamentary Association for Motorsport Promotion of the Liberal Democratic Party of Japan, as well as the Commissioner's Cup from the Japan Tourism Agency. Towards the Team Champion, the Minister's Cup will be awarded by the Ministry of Economy, Trade and Industry, plus prize money by Japan Race Promotion Inc.
- **RACE CAR** The base chassis SF14 is supplied by Dallara (Italy). The cars are powered by 2.0-litre turbo-charged inline-4 direct injection engine either from Honda (HR414E) or Toyota (RI4A). Bridgestone serves as the sole tyre supplier.
- **OVERTAKE SYSTEM** The Overtake System (OTS) is an overtaking aid that works by leveraging the fuel flow restrictor (fuel flow rate control system) employed on the new engine. It can increase fuel supply temporarily to provide approximately five per cent of engine performance improvement. By pressing a button called OTB (Overtake Button) on the steering wheel, the system will be activated for 20 seconds per use. Drivers may use the OTS up to 5 times a race. The status of the OTS use can easily be recognized by "Overtake Lamp (five small LEDs)" on the roll hoop. The number of lighted Lamp(s) shows the number of OTS activation, and on top of this they are blinking when the system is in use. The Lamps basically illuminate white while the championship leader comes with red lights called "Leader's Red". The Overtake Lamp system can only be seen in SUPER FORMULA.
