Round 4 : August 19 (Saturday) –August 20 (Sunday)

2017 Japanese SUPER FORMULA Championship : Twin Ring Motegi

Japan Race Promotion Inc. (President: Akira Kurashita, Head office: Chiyoda-ku, Tokyo, Japan) today announced details of Round 4 of the 2017 Japanese SUPER FORMULA Championship Series, scheduled to take place on August 19-20 at the Twin Ring Motegi Road Course (length = 4.801 km) in Tochigi Prefecture, Japan. The event also marks the 20th anniversary of the circuit.

Round 4 will feature an official qualifying session based on a knock-out format, followed by a championship race run over 52 laps (249.672 km) of the Twin Ring Motegi Road Course. The circuit has a stop-and-go layout characterized by repeated braking and acceleration, which puts significant stress on the brakes. The layout and the August heat make Motegi a tough race for cars and drivers alike each year.

Round 4 will also see the introduction of soft compound tires, giving teams another option to the medium compound tires used so far this season. All teams are required to use both types of tire in the championship race. Motegi is known as a difficult circuit for overtaking, but the soft compound tires should make the race more competitive. Attention will also be on team race strategies, particularly decisions on whether to use both types of tire in the qualifying session.

Round 3 at Fuji Speedway saw Hiroaki Ishiura (P.MU/CERUMO · INGING) secure his first win in roughly a year, putting him at the top of the driver standings. Andre Lotterer (VANTELIN TEAM TOM'S), who has grabbed points in every race so far this season, sits second in the rankings. Third is Yuhi Sekiguchi (ITOCHE ENEX TEAM IMPUL), who dominated the two-race format Round 2 at Okayama, followed by Kazuki Nakajima (VANTELIN TEAM TOM'S) in fourth, winner of the opening round. This year's rookie drivers are also threatening the top spots, with Felix Rosenqvist (SUNOCO TEAM LEMANS) currently sitting in fifth and Pierre Gasly (TEAM MUGEN) in eighth. They will have to put in a good performance at Motegi to stay in the running for the championship.

No. 2 Hiroaki Ishiura (P.MU/CERUMO · INGING) is currently top in the driver standings

OFFICIAL QUALIFYING KNOCK-OUT FORMAT

Q1 (20 minutes) : Top 14 cars progress to Q2, grid positions 15-19 fixed

Q2 (7 minutes) : Top 8 cars progress to Q3, grid positions 9-14 fixed

Q3 (7 minutes) : Grid positions 1-8 fixed

- 10 minute intervals between each qualifying
- As the name suggests, drivers are knocked out if they do not post good enough times during the first two qualifying rounds.

CHAMPIONSHIP RACE

52 laps (1 lap: 4.801 km x 52 = 249.652 km)

SOFT COMPOUND TIRES

In Round 4, the teams will be able to use a soft compound tire, as well as the existing medium compound tire. The new tire is an upgraded version of the soft compound version introduced at last year's Motegi round. The tire has been developed to provide better grip, but it also degrades at a faster rate.

At Motegi, each team will have two new sets of medium compound tires and three new sets of soft compound tires. On the Friday before the event, the teams will be allowed to use two old sets from the previous race and the three new sets of soft compound tires. From Saturday, they will have to select six sets from their total of seven new and old sets of medium and soft tires.

TWIN RING MOTEGI ROAD COURSE

The Road Course is a European style track with a total distance of 4.8 km. Motegi is an internationally accredited circuit with 14 corners

(8 right and 6 left), a long straight of 762 m and a maximum elevation change of 30.4 m. The layout helps to create varied, exciting races. The circuit's stop-and-go layout, characterized by straights leading into tight corners, is extremely hard on brakes. Areas for overtaking are also very limited, with the entry into the 90 Degrees Corner after the Down Hill Straight an ideal spot to watch drivers compete for the best line under braking conditions.

• BS Fuji :

Live Race Broadcast "2017 SUPER FORMULA ROUND 4 Motegi"

This program will be broadcast "live" and hosted by Super Formula's official commentator Pierre Kitagawa, with additional commentary by Super Formula ambassador Satoshi Motoyama. Tsugio Matsuda, a highly respected technical commentator, and Miki Higashi, will give reports from the pit as well as after-race interviews.

Trackside: Pierre Kitagawa
 Commentary: Satoshi Motoyama
 Pit reporters: Tsugio Matsuda and Miki Higashi
 Broadcast time: August 20 (Sun) at 14:00 -15:55

*For more info on the program, visit the BS Fuji website < <http://www.bsfuji.tv/superfomuralive/pub/index.html> >

• BS Fuji :

"Super Formula Go On!"

This talk-show program hosted by Super Formula drivers Kamui Kobayashi and Daisuke Nakajima will showcase the appeal of Super Formula by introducing key people from the sport today. High-profile guests from within and outside the industry will be featured each program. Pierre Kitagawa will assist the hosts, and Hina Higuchi, a member of top-idol girl band Nogizaka 46, will narrate the show. In the race digest segment, Tsugio Matsuda, the pit reporter in the "live" broadcast will deliver in-depth commentary, complemented by reports from the race track by Miki Higashi.

Broadcast times: Show # 4 August 13 (Sun) at 25:00 -25:55 (Re-broadcast)
 Guests: Satoshi Motoyama and Juichi Wakisaka
 Show # 5 September 2 (Sat) at 23:00 -23:55
 September 3 (Sun) at 25:00 -25:55 (Re-broadcast)

GET TO KNOW THE BASICS

■ WHAT IS SUPER FORMULA?

Japanese SUPER FORMULA Championship is the top category of formula racing in Japan featuring purpose-built racing cars with a single-seat, open cockpit and open wheels. Organized by Japan Race Promotion, Inc. and fully sanctioned by the Japan Automobile Federation (JAF), SUPER FORMULA traces back its origins to the Japanese Championship Formula NIPPON first launched in 1996. 2013 saw the re-launch of the series under the new name of SUPER FORMULA.

■ ABOUT THE CHAMPIONSHIP

The 2017 Japanese SUPER FORMULA Championship Series is the only internationally accredited driver championship in Asia, run over seven rounds and six circuits across Japan. A total of 11 teams (entrants) and 19 drivers (cars) from Japan and overseas*¹ are competing to win this year's series.

*¹ 13 drivers from Japan and six from other countries: New Zealand, Sweden, France, UK, Germany, and India

2017 CHAMPIONSHIP RACE CALENDAR

	DATES	CIRCUIT	QUALIFYING FORMAT	RACE FORMAT
Round 1	April 22 – 23	Suzuka Circuit	Knockout	200km
Round 2	May 27 – 28	OKAYAMA International Circuit	Timed/Knockout	2-Races
Round 3	July 8 – 9	Fuji Speedway	Knockout	250km
Round 4	August 19 – 20	Twin Ring Motegi	Knockout	250km
Round 5	September 9 – 10	AUTOPOLIS International Circuit	Knockout	250km
Round 6	September 23 – 24	Sportsland SUGO	Knockout	250km
Round 7*	October 21 – 22	Suzuka Circuit	Knockout	2-Races

* "The 16th JAF GRAND PRIX SUZUKA"

2017 CHAMPIONSHIP POINT SCORING SYSTEM

POSITION	Winner	2nd	3rd	4th	5th	6th	7th	8th	9th & beyond	PP
1 race round	10	8	6	5	4	3	2	1	0	1
2 races round Race 1	5 (+3)	4	3	2.5	2	1.5	1	0.5	0	1
2 races round Race 2	5 (+3)	4	3	2.5	2	1.5	1	0.5	0	1

Notes

- 1) For 2-race formats, half the number of points shall be awarded in each of the two races except for pole position which brings one point for each race.
- 2) In Round 7 (Final Round) at Suzuka Circuit, the winner(s) in race 1 and race 2 shall be awarded an additional 3 points per race. Should the same driver take pole position and win in both race 1 and race 2, he would earn a maximum of 18 points for the Round.
- 3) In the event of any ties for position, the driver or team with superior race results—based on descending order from number of wins to number of second places and so forth—will gain precedence.

Rookie of the Year:

Should there be three or more rookie drivers participating for the first time in the SUPER FORMULA series, the rookie driver with the highest number of points at the end of the season shall be named Rookie of the Year.

Team Points

- a) Team Points are calculated by adding the points earned by the driver or drivers belonging to the team.
- b) Should a team enter more than two cars at any race event, only the best two results shall be taken into account.
- c) Pole position points shall not be included in the Team Points.

■ CHAMPIONSHIP AWARDS

The Drivers' Championship title is awarded to the driver who scores the most points over the course of the season. The Champion is awarded the Series Driver's Champion Cup and prize money by Japan Race Promotion, Inc. In addition, the Champion receives the Confederation's Cup offered by the Parliamentary Association for Motorsport Promotion of the Liberal Democratic Party of Japan, as well as the Commissioner's Cup from the Japan Tourism Agency. For the Team Champion, the Minister's Cup will be awarded by the Ministry of Economy, Trade and Industry, plus prize money from Japan Race Promotion, Inc.

■ RACE CAR

● Chassis

Since 2014, SUPER FORMULA race cars have used the SF14 chassis, which is made by Italian company Dallara and is based on the "quick and light" design concept. The adoption of the SF14 chassis has led to a dramatic improvement in the quality of races, leading to greater interest in SUPER FORMULA overseas.

● Engines

Honda and Toyota, two of Japan's leading automakers, have developed engines for SUPER FORMULA based on the NRE engine concept², which is part of each automaker's efforts to develop next-generation engines. SUPER FORMULA cars are currently powered by the HONDA HR-417E or the TOYOTA R14A.

All engines are fitted with fuel flow restrictors. By setting fuel flow limits, the key to winning races is how efficiently fuel can be converted into power.

Competitive development between automakers has resulted in a highly efficient engine with higher brake specific fuel consumption (BSFC) and net thermal efficiency better than hybrid vehicles currently on the market, helping to advance the development of next-generation engines.

² NRE engine specifications

Honda, Toyota and Nissan together agreed on a number of criteria for race engines that incorporate environmental technology while also preserving the excitement of motorsport.

Cylinder configuration	: Inline-four
Displacement	: 2,000cc + turbo
Fuel intake system	: Direct injection
Fuel flow limits	: 95kg/h for Suzuka and Fuji Speedway circuits, 90kg/h for other circuits

● Overtaking System

SUPER FORMULA introduced an overtaking system (OTS) in 2009 as part of initiatives to make races more exciting. SUPER FORMULA was the first competition in the world to adopt this system. The OTS encourages drivers to make more overtaking maneuvers, one of the most exciting parts of motorsport. The SF14 OTS system uses the fuel flow restrictor fitted to engines to temporarily increase fuel flow to the engine, boosting power³. Drivers use a button on the steering wheel to activate the system for 20 seconds up to five times during a race or five times total for 2-race formats.

The Overtaking Lamps (OTL) on the roll hoop indicate when the system is in use, allowing spectators to see when drivers have activated their OTS. The racing driver with the most Championship points has the distinction of an OTL with red lamps, called "leader's red" whereas the other cars' OTL lamps are white.

³ Overtaking system specifications

Mechanism	: Activating the overtaking system boosts fuel flow by 10kg/h
Impact	: Activating the overtaking system increases engine output by around 60PS, or 10%
Rules	: Drivers are allowed to use the system up to five times per race for 20 seconds.

● Tires

Yokohama Rubber became the sole tire supplier from the 2016 season. Yokohama Rubber's ADVAN racing tires perform well against SUPER FORMULA's rigorous criteria for grip, durability and safety, adding to the excitement of race events.
